

Interfacing Technologies Corporation is a dynamic Montreal-based software & services company with over 15 years of experience in process modeling, simulation, knowledge, and performance management software. Among Interfacing's clients are world-class organizations from diversified sectors and management consulting firms.

The Senior Database Administrator will report to the R&D Manager and will be responsible for all aspects related to the development and architecture of the database. This will ensure that all Interfacing software products meet company, customer and industry standards. The candidate must be proficient with MySQL and Microsoft SQL Server.

Task Description:

- Responsible for database architecture and design
- Develop and supervise development of all database related assets
- Work closely with the Product Owner and Business Analysts to understand the system and functional requirements
- Work closely with the R&D Manager and Architect Team to ensure integrity, performance, and other non-functional requirements
- Design RDBMS structure for scalability, maintainability, performance and robustness of multi-user server
- Collaborate in development of Object-Relational mapping
- Design physical and logical database schema

Qualifications:

- University degree in Computer Science or Software Engineering (or equivalent)
- Five or more years of experience in Database development
- Excellent SQL design skills, including logical and physical design
- Strong experience in MySQL and MSSQL is a must
- Expertise in MySQL and MSSQL profiling
- Experience with BI, data analytics, and reporting tools
- Experience with Cognos is an asset
- Experience in Oracle is an asset
- Good understanding of Java/J2EE, EJB and Hibernate is an asset
- Knowledge of Business Process Modeling/Management (BPM) is an asset
- Experience working in a Java/J2EE development team is an asset
- Bilingualism, with a high command of verbal and written English

Interpersonal skills:

- Self-motivated, team player, action-and-results oriented
- Well organized, good communication and reporting skills
- Ability to successfully work under tight project deadlines

Organizational "Fit" Considerations:

Interfacing Technologies is seeking a team player who enjoys technical challenges within a fast-paced environment, applies sound judgment in successful task planning and execution, meets deadlines, and communicates the highest standards of professionalism in his/her appearance and work habits.

If you have the interest in professional growth and joining a leading Canadian Software and Services company, it is time to consider joining Interfacing Technologies Corporation!
